Leaked Document Case from PM's Office

Attorney General Gali Baharav-Miara has authorized a comprehensive investigation into recent developments concerning the leak of sensitive military documents related to Hamas' efforts to foil a hostage deal from Prime Minister Benjamin Netanyahu's office. This decision permits authorities to probe the Prime Minister's Office and, if necessary, Netanyahu himself, after Eli Feldstein, a spokesperson in the Prime Minister's Office, was identified as the main suspect in the investigation. He was arrested on October 27, 2024, on suspicion of leaking classified

intelligence material.

Several other suspects, including IDF officers, have been arrested in connection with the case, bringing the total number of suspects to five.

The leaked documents reportedly included **classified information from the IDF's Intelligence Directorate. One such document was cited in a September 6, 2024, article by Germany's Bild newspaper, which claimed that Hamas was prolonging hostage negotiations as a form of psychological warfare against Israel.** The leaks are alleged to have damaged efforts to secure the release of hostages in Gaza, with critics suggesting that the timing and content of the leaks aligned with Netanyahu's public statements against a potential hostage deal.

Netanyahu's office has denied any involvement in the leaks, emphasizing that no official staff members have been arrested and condemning the ongoing obfuscation as a cover for deliberate and malicious slander against the Prime Minister's Office.

Some reports that the leaked information is may have **hindered efforts to negotiate the release of hostages held by Hamas. The exposure of classified intelligence may have compromised Israel's negotiating position and provided Hamas with insights into Israel's strategies.** This claim has not been substantiated yet and no conclusive evidence were presented"

There are also suspicions concerning attempts to **modify official protocols from the onset of the war, raising concerns about the integrity of governmental records and decision-making processes during critical periods.**
